## Session Description

\* 4. Describe the challenge or problem this session addresses: (Max word count: 150)

*TIP: Your answer here should paint a picture of the issue your session is addressing.*

**The next two questions are the most important ones when it comes to how we evaluate your proposal. Be sure to include as much specific detail here as you can about the strategies, approaches, concepts, tools, and technologies you plan to cover so we can best understand your vision for the full length of the session.**

\* 5. Describe how the session will provide a solution for attendees. (Max word count: 400)

*TIP: This section is where you should focus your energy to let the attendees know the details of your solution/approach and what's special about your angle on this topic. (Our attendees love details, so the more spoilers you give them about the specific content you'll be covering the better!)*

**For reference only.  
Not for proposal

*TIP: This is also your opportunity to expand upon any strategies, techniques, and/or skills you touched on in the previous two questions.*
